About Us

Our company, which has been serving in the field of women's classic clothing in the textile industry for approximately 25 years, carries out textile production at all stages with high quality and products that will satisfy the end consumer. As a manufacturer, with our own brand and for our customers who wish - in large quantity orders - with their own brand; The design, pattern, fabric cutting, sewing, ironing-packaging and quality control stages of the products are carried out entirely within our own structure. We have full confidence in our products in terms of product pattern, sewing quality and fabric quality, which are the three main elements of textile production. Although the designs of our products, which have a high satisfaction rate for both companies and end consumers, are our own, we also have the capacity to produce our customers' own designs if they wish. Our customers can visit us in our store in Merter (Istanbul/Turkey), have a pleasant shopping experience and see the beauties of Istanbul. We are pleased to welcome our valued customers in this store.
